

The adaQuest story:

adaQuest, Inc. was founded by experienced project management professionals who recognized the need for a more efficient project management model. adaQuest specializes in a unified approach to Localization Services, Project Portfolio Management (including Enterprise Project Management), and PMO Solutions.

Headquartered in Bellevue, Washington, adaQuest has been assisting clients in meeting project and corporate objectives since 2001.

“adaQuest has just done an amazing job for us – they got involved during the Beta 1 development of Project Server 2010 and were able to demonstrate their strength and knowledge right away. Working closely with the Microsoft Project Development team, they delivered an amazing solution that enabled my team to successfully deploy Project Server 2010 within the Microsoft Human Resource Division (1600 users). I would recommend adaQuest to anyone without any hesitation.”

—Bruno Lecoq, Microsoft Human Resources, 2009, Director Operation Excellence

“With the expertise of adaquest as a consulting partner, my team successfully deployed our Project Server 2010 solution on time and on budget. adaquest provided the customization and training expertise required to make it happen.”

—Joel Lachance, Compliance Manager Microsoft Corporation - 2009

Project Portfolio Management

- Do you want to know how projects within your organization align with your strategic business objectives?
- Do you seek to maximize the benefits of your project portfolio?

If the answer to any of these questions is yes, then your organization is ready to engage in a partnership with adaQuest's team of A-players in Project Portfolio Management.

Project Portfolio Management

Project Portfolio Management (PPM) empowers intelligent organizational strategic planning. PPM brings awareness into all investments of a project portfolio. This ensures that decision makers have the big picture view while strategically managing costs and resources that align to corporate objectives.

adaQuest's experienced PPM staff is available to guide you through the project portfolio solutions, evaluation and adoption process. The following questions typically indicate the need for PPM:

- Which projects are right for us to invest in?
- Do we have the capacity to take on the new project?

adaQuest creates partnerships with its customers by mapping and integrating our processes with your needs. We listen to you. adaQuest offers step-by-step solutions that will provide your organization with PPM piece of mind.

This model allows us to provide the best service possible. Utilizing the best technology, we offer scalability and the practical, and effective solution your organization needs.

With adaQuest PPM services you can expect:

- To evaluate and assess the cost and benefit of any project,
- To implement standard processes, procedures and workflow,
- To increase team communication, collaboration and efficiency through a central project repository.

Our methodology allows organizations to see a rapid return on investment.

The following sections provide an outline for two of the technologies used by adaQuest and its clients to fully achieve strategic project portfolio comprehension.

EPM WorkEngine®

With WorkEngine® from EPMLive users can collaborate on tasks, report on work performed and manage projects in a single web application. WorkEngine is built upon the collaboration industry's leading technology, Microsoft SharePoint®.

ROI from WorkEngine®:

- You will gain insight into what resources are doing at any time,
- Business decisions are made with consistent and accurate data,

- Data metrics are consistent across projects and departments,
- Employees easily comply with requests for information,
- Efficiently support distributed or remote employees,
- Gain compliance with industry best practice through the use of templates (included).

Microsoft Project Server 2010

Through tight integration with SharePoint Microsoft® Project Server 2010 delivers comprehensive enterprise project and portfolio management functionality.

The key features of Project Server 2010 are:

- Demand Management, to enable proposal approval and progress execution.
- Easy delegation of authority and permissions to be shared between users.

Companies need to know what is being done and how each project aligns with broader business priorities, and objectives. With adaQuest PPM services you can expect to achieve this and more.
